WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

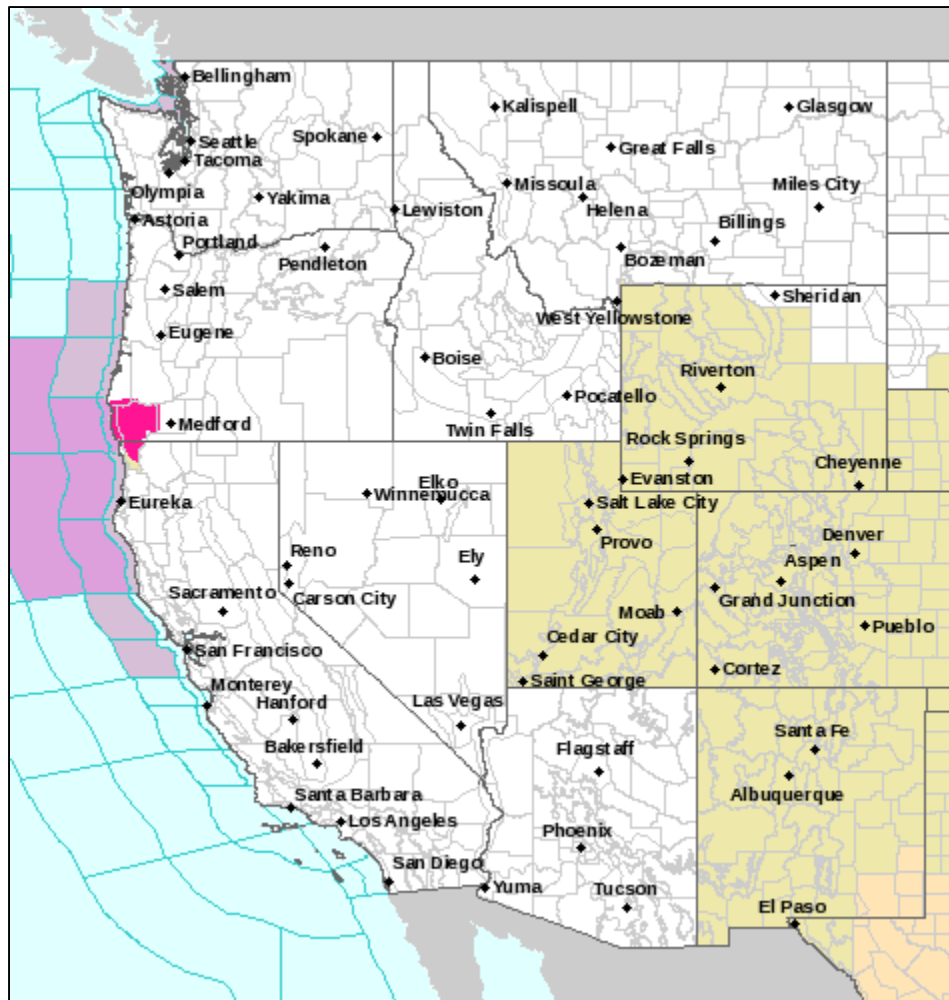

- Localized gusty N-NE winds coupled with low Relative Humidity (RH) across the northwest third of the region through Monday
- Region will be caught on the drier backside of a Pacific trough through early next week.
- Another Pacific trough will begin to influence the area's weather late week into the following weekend. Weather models are starting to show some consistency, run to run, with their pattern depiction but still looking at moderate confidence in terms of actual effect.
- Near term weather focus remains localized gusty N-NE and NW winds through Monday night. Gust speeds generally ranging between 20-25 mph favoring Del Norte/Siskiyou counties as well as the upper Sacramento Valley. A pronounced northerly flow will favor the Sacramento River portion of the Valley next two overnights.
- Some climatologically breezy S-SW-W winds should return by late next week.
- 24 hour average RH values will remain low most areas with some single digits and teens during the afternoon's and poor to moderate recoveries at night through Tuesday morning. Humidity should slowly begin to rise Tuesday and beyond.
- Temperatures remaining above normal most areas through midweek then slight cooling thereafter.
- Precipitation is not likely during the next 7 days but can't rule out a few buildups over or near the Tahoe Basin Tuesday evening thus a slight chance of a dry thunderstorm.

SOUTHERN CALIFORNIA

- A weak trough will sit over California through Wednesday. High pressure in the Eastern Pacific Ocean will approach California Thursday and Friday before shifting west next weekend.
- Isolated showers and thunderstorms will form across Central California from the Sierra Crest eastward to the Nevada border Monday afternoon through Wednesday afternoon.
- A deep marine layer will cause morning low clouds and fog to make it over the lower coastal mountain slopes through Wednesday.
- Maximum temperatures will be near to a little below normal through Wednesday, with 70s to low 80s across the mountains and 80s to mid 90s in the valleys.
- Temperatures will warm to near or a little above normal Thursday through next weekend.
- Minimum humidity will be mainly between 15%-30% above and inland from the marine layer through next weekend.
